## FALL 2024

As 2024 approaches we are excited to share further developments and innovations in our products, and designs that deliver modern solutions with legendary functionality to our consumers every day. This season is about our products enhancing our consumers lives with a focus on Café and Hydration with revised and bettered features, we are bringing a refreshed product lineup and introducing new colors that are rich and grounding for the Fall season.

## OUR HISTORY

---

In 1913, our founder, William Stanley Jr., invented the all-steel iconic vacuum bottle and formed the Stanley Bottle Company. In the 100+ years since this brilliantly simple solution, his ingenuity has kept our beverages at the desired temperature during outdoor, work, sporting, recreational and other adventures.

## OUR IDENTITY

---

Stanley is defined by Creativity, Building and Invention. Driven by purpose, passion & performance: We are passionate about creating purposeful products that perform. That's how we make a difference. We are proud of our yesterday, focused on tomorrow.

## OUR MISSION

---

At Stanley we believe that through invention and originality we create a more sustainable, less disposable life and world. Our Built For Life™ product promise is the foundation for our approach to sustainability and corporate responsibility.

## OUR PROMISE

---

Since 1913, we've kept our promises. Whether building products to last a lifetime or delivering on innovation of keeping food and drink at the ideal temperature. We've stood behind our word. Backed by our lifetime warranty and our Built For Life™ guarantee, we ensure our products will both endure and sustain in your world – everyday.

# SUSTAINABILITY AT STANLEY

Our Built For Life™ product promise is the foundation for our approach to sustainability and corporate responsibility. It is part of our mission to create a more sustainable, less disposable life and world. By the end of 2030, we aim to reduce annual greenhouse gas emissions by 50%.

## BUILT FOR LIFE™

Our design principles prioritise functionality and durability. Stanley products are created and manufactured to last a lifetime. And we stand behind that with our Built For Life™ lifetime warranty.

## RECYCLED MATERIALS

Stanley prioritise recycled and upcycled materials. We're committed to making at least 50% of our stainless-steel products from recycled materials by 2025.

## SUSTAINABLE PACKAGING

We reduce unnecessary packaging and increase sustainable content wherever possible. We have eliminated most conventional plastic packaging. All paper packaging will be certified sustainable or recycled by 2025.

## VALUES-LED MANUFACTURING

Stanley seeks suppliers that meet our high standards of environmental responsibility. We work closely with factories to meaningfully reduce energy use in their operations and reward those who show continuous improvement year after year.

## RECYCLED STAINLESS STEEL

The material is made from 90% post-consumer scrap steel and is RCS certified. The quality is the same as our proven 18/8 stainless steel. Recycled stainless steel uses fewer natural resources and produces fewer emissions compared to virgin steel. Plus, recycled stainless steel helps keep valuable materials in circulation and out of landfills.

# WHAT WE HAVE ACHIEVED IN 2022

## SUSTAINABILITY

In 2022, 74% of our footprint was generated by raw materials. Using recycled stainless steel is the most impactful way to reduce this.

23% of Stanley's stainless steel units produced were made of this recycled stainless steel – putting us more than halfway to our goal of 50% of units by 2025.

Stanley procured more than 4 million kilograms of certified, recycled stainless steel in 2022 alone.

23%

of Stanley's stainless steel units produced were made of certified, recycled stainless steel in 2022

4M+

kilograms of certified, recycled stainless steel procured for Stanley products in 2022

## ETHICAL SOURCING

100% of Stanley suppliers achieved the highest possible score on their social compliance audits (the equivalent of an 'A' grade), which are aligned to global labor standards.

## SOCIAL IMPACT

Stanley donates more than 1% of prior year's net income before taxes in cash donations to non-profit organizations around the world each year.

Every year we publish our impact report that shows our progress around corporate responsibility. You can read the full report on [www.stanley1913.com/pages/sustainability](http://www.stanley1913.com/pages/sustainability).

## 4D THERMOLOGY™

Stanley's 4D Thermology™ technology elevates our legendary double wall vacuum thermal performance to a best in class insulation. Building upon our double wall vacuum insulation, 4D Thermology™ features two additional thermal barriers between the inner and outer bottle walls for 4 layers of insulation. These four layers add protection from convective, conductive, and radiant energy transfer to lock in heat or cold better than any other technology.

## DOUBLE-WALL VACUUM INSULATION

Stanley's legendary thermal performance all begins with our Double-Wall Vacuum Insulation technology. By removing the air between the inner and outer walls of our vacuum insulated products, we greatly reduce the thermal transfer between the outside environment and the contents of the bottle. The insulation effect of double wall vacuum insulation allows beverages to stay hot or cold longer compared to traditional drinkware or food storage containers without this technology.

## AEROLIGHT™

Stanley's AeroLight™ technology takes you farther, faster – bringing a whole new meaning to portable thermal insulation. We took Stanley's legendary double wall vacuum insulation and made it up to 33% lighter. Through advanced manufacturing processes, we stretch the material of the inner wall to significantly reduce weight, without compromising hot/cold retention or durability.

CAFÉ

BAR

Stanley Café focuses on the passion of craft coffee and tea, regardless of the setting, scene or environment. Ideal for sitting, sipping and contemplating the world — with a hot beverage in hand — our collection delivers your inspiration with your caffeination.

Beer, wine or spirits, we all appreciate a good drink, especially with good company in uplifting surroundings. Stanley Bar takes that drink outside with dramatic appeal and truthful technology — whether sharing a cold beverage with the neighbour or enjoying a craft cocktail at sunset.

HYDRATE

ORIGINALS

Stay healthy, stay hydrated — that's the defining mantra of our thoughtfully considered drinkware. Built with modern energy, awareness and respect for human wellbeing, as well as the environment, this category brings true invention into our natural daily habitats.

It's hard to outshine our original and this foundational collection stays true to our heritage and brand promise to deliver taste and temperature to the world outside. Honouring our legacy and history, it shows its roots in the brilliant thermal technology that's delivered for over a century.

COOKOUT

Stanley Cookout brings clean, intelligent, innovative and stylish gear to the global campsite. Whether way out in the woods or closer to home, our entire collection brings both ease and expertise to experiencing the wild without sacrificing the comfort or the culinary harvest.

MOBILITY & STORAGE

When transporting good food or drink is the goal, our innovative storage solutions are designed to keep food and beverages appropriately chill for the task at hand. From beach trips or backyard cookouts to camping out, our collection is shaped and streamlined to embrace and enliven the entire world outside.

# OPEN MIND

Considered / Curated / Conscious

## CONSUMER

The Open Mind consumer has a carefully curated lifestyle. They appreciate the need for self-care and believe that health, wellness and body positivity are essential.

They shop consciously and look to invest in key items they can rely on to compliment their day to day life.

## STAY-HOT CAMP MUG

The Stay-Hot Camp Mug 0.23 L has the legendary performance you expect from a Stanley. This one is built to last, with solid 18/8 stainless steel construction. Double-wall vacuum insulation keeps your favorite drinks hot for hours, and the secure press-fit Tritan™ Drink-Thru Lid prevents splashes and makes sipping easy. Keep it with you on your desk, take it on the road, or enjoy it while lounging by the fireside.

**AEROLIGHT™ TRANSIT MUG**

Our Transit Collection with AeroLight™ technology is engineered to be light, packable, and leakproof for the trail or the daily commute. Our commuter-friendly Transit Mugs are 33% lighter than Stanley's standard stainless steel metal drinkware. The collection is built with Stanley's AeroLight™ technology, which consists of spun-steel, doublewall vacuum insulation to reduce weight—without compromising hot/cold retention or durability. These fully leakproof mugs offer a streamlined design and low-profile lid, compact and easy to carry. They also fit comfortably in car cup holders.
